IMagic Hotel Reservation Crack + Free Registration Code

Create your own Hotel Software, with over 100 individual functions, and take care of the reservations, the prices, the invoices, the stays. Get all your customers and rooms into one central database, and generate your reports. Create your own Hotel Software, with over 100 individual functions, and take care of the reservations, the prices, the invoices, the stays. Get all your

customers and rooms into one central database, and generate your reports. KEYMACRO features: Customers Customers will list their profiles and profiles can be created for those not registered yet. Each customer has an own list of registered rooms and each of those rooms has a number of bedrooms. Day rooms can be set to either standard or economy, and the service menu can be selected for both when you are booking or making a reservation. The rooms can be named and the price and other information can be specified. The customers can be grouped, and it is possible to have a group view, a list view and a detailed view. Apartments, hotels, restaurants You can select and manage the type of room, the service, and the equipment. You can even create different menus for different seasons. It is possible to use invoice or booking for a client, the customer can register with the hotel, and a credit card can be accepted. You can receive a confirmation and be provided with a receipt. Budgeting, lead tracking, e-marketing You can budget for rooms, bills, or both, and there is an overview of the room inventory and a report of the rooms used. It is possible to create a detailed report for any room. And a lot more.... Keymacro uses MySQL database to store all your data. For each Hotel there is a database with tables with one table for each hotel room. The tables are called Rm, Me, Sme, Dme, Hme, Gme, and Se. The tables have columns for hotel_id, room_id, room_type, room_number, room_color, room_bath, room_price, season, rate_season, rate_day, rate_week, rate_year. The tables in the backend have the columns owner, date_1, date_2, date_3, date_4, date_5, date_6, date_7, date_8, date_9, is_charged, booking 1d6a3396d6

IMagic Hotel Reservation

Features: ♦ Created and organized in a simple and easy to use interface ♦ Works in multiple languages, both English and German ♦ Booking Manager for individual rooms ♦ Booking Manager for entire rooms ♦ Booking Manager for entire hotels ♦ User defined room rate and other rate types ♦ User defined cost for customer ♦ Payment acceptance methods, iMagic Customer ♦ BONUS SYSTEM ♦ Calendars and To-Do Lists iMagic Hotel Reservation - New 2014-10-17 07:40:33 By: Gizmota Lightweight and easy to use The first time you run the application, a welcome screen offers to take you on a tour in order to quickly get acquainted with all of the application's features. Additionally, you can take advantage of an integrated wizard system to quickly set up rooms. However, the application is cleverly designed to let you quickly accommodate, with no previous experience required to get started. In more technical terms, it takes little space on your hard disk drive and your computer won't feel a thing from running it. Create rooms and customer lists In orderly to be able to properly handle the business, you need to set up rooms, each requiring a name or number. Unfortunately, the only way to differentiate special rooms is through names, price tag applying as a default. This can be changed, but only when a reservation is created. The application also lets you create a thorough client database. From basic info to business details, nearly anything can be specified. These can be viewed in a list and you can switch to display only those who did not pay in full. Add reservations and issue detailed reports Occupying a room only takes a few easy steps. Date settings need to be adjusted at first, room which is occupied, customer, as well as payment method where you can add multiple items or services. You can also print

What's New In?

The first time you run the application, a welcome screen offers to take you on a tour in order to quickly get acquainted with all of the application's features. Additionally, you can take advantage of an integrated wizard system to quickly set up rooms. However, the application is cleverly designed to let you quickly accommodate, with no previous experience required to get started. In more technical terms, it takes little space on your hard disk drive and your computer won't feel a thing from running it. Create rooms and customer lists In orderly to be able to properly handle the business, you need to set up rooms, each requiring a name or number. Unfortunately, the only way to differentiate special rooms is through names, price tag applying as a default. This can be changed, but only when a reservation is created. The application also lets you create a thorough client database. From basic info to business details, nearly anything can be specified. These can be viewed in a list and you can switch to display only those who did not pay in full. Add reservations and issue detailed reports Occupying a room only takes a few easy steps. Date settings need to be adjusted at first, room which is occupied, customer, as well as payment method where you can add multiple items or services. You can also print receipts in case they need to be handed out. For accounting purposes, you are able to issue various reports. From a simple customer or room list, to billing and calendar, nearly any important aspect can be printed out on a sheet of paper or exported to a text file. To end with All in all, iMagic Hotel Reservation is a handy and easy to use application that surely helps you run a business more efficiently. It's not the best of its kind, with several missing features, but it's easy enough to use so you don't spend much time going through all it has to offer, and manages to get the job done well. Managing a hotel business is hard. You have to fill rooms, manage reservations, calculate bills and maybe even provide a special service for your customers. Thankfully, the iMagic Hotel Reservation application makes the process much easier. This software provides all the tools to help you manage a hotel business. To start, you have to create a client list, rooms, as well as customers. Each customer is provided with a detailed database including all the information you need to keep track of them. Besides being able to create rooms and customers, you can also add services to them, print receipts as well as issue detailed reports. With iMagic Hotel Reservation, you no longer have to be a computer wizard in order to manage your hotel business. In fact, you don't even need to learn how to use a computer. You can easily access your
