AutoCAD is a computer-aided design and drafting (CAD) application that makes it easy to create, modify, and publish 2D and 3D drawings. AutoCAD is often used to generate building, vehicle, and mechanical designs. AutoCAD is often considered to be the "household name" in CAD. It was developed in 1982 by Autodesk as a desktop application that could run on a single computer. AutoCAD began as a desktop app, but Autodesk later released it as a web application. AutoCAD is still available as a desktop application, and as a web and mobile app. In AutoCAD, you create and edit 3D objects, add text and graphics, work with dimensions, and generate plans, sections, and elevation drawings. You can use AutoCAD to create building blueprints, vehicle designs, mechanical designs, and drawings for factories, turbines, and more. Advantages of AutoCAD Over time, AutoCAD has become the most popular CAD program in the world, and was chosen as a best CAD program in the 2015 and 2017 USASIG Design Awards. I will be travelling alone. What should I pack, for safety's sake, to help me blend in? I am not looking for much -- just a few mementos of our special place and time and some nice clothes. I do not like to mix too much colour in my clothes. Brianna, from the archives: "I will be travelling solo to Canada where my sister, her partner and my niece and nephew are living. I will arrive on a Monday. I will spend the week with my sister and her partner, then will be staying the night at my niece's house on Saturday. I will then stay the night with my sister on Sunday and return to the airport by Tuesday." What should she pack? "Clothes for the week, bras for myself, the choice of the weather in Canada (yep, I'll keep that nightdress!), a couple of T-shirts or tops for the nights in the house, nightdress, toothbrush, a deodorant, contact lenses, hairbrush, moisturiser, sewing things, wet wipes for the bathroom, a comb for hair, and a variety of makeup, including the concealer for my blemishes.
